	<p>As the world prepare for the opening ceremony for Summer Olympics 2008, many sports fanatics are also preparing better equipments and tools to catch and capture every game. In the spirit of the game, the newest version of HyperMedia Center (HMC) from KWorld Compute Co., Ltd., users may set Continuous Snapshot function with the minimum time interval of 200 milliseconds and the maximum number of pictures to be captured, from which, users will be able to always find the best shot and use it anywhere on the internet!</p> <p>Starting in August coinciding with Summer Olympics 2008, PlusTV packaging will dress-up with a little black skirt that communicates to the end-users what Continuous Snapshot is all about. For users who already own a PlusTV device with the newer version of HMC, its Live Update function will automatically help the users download the newest software and driver. Whereas, for users with the older versions of HMC, please visit the KWorld website at www.kworld.com.tw to obtain the newest version of HMC and driver.</p> <p>welcome visit KWorld at www.kworld.com.tw</p> <hr/> <p>Polly Peng Marketing Specialist KWorld Computer Co., Ltd</p>
